Janine Louie is our Director of IT Applications and Development and is based in our London office. She leads strategic initiatives to enhance our technology landscape. She collaborates with cross-functional teams, ensuring seamless software development, efficient application management, and innovative solutions for our clients and stakeholders.

A key aspect of her team's role is process improvement. They are dedicated to continuously refining processes and systems, implementing best practices, and leveraging technology to enhance efficiency, streamline workflows, and drive operational excellence across the firm.

Since joining us in 2016, Janine has delivered numerous technology-related projects and she continues to leverage her expertise to drive technological innovation within the firm.

Education

University of Auckland (MSc)
2009
